Guidelines for confirmation presentations

- Presentations will take place immediately before your confirmation meeting and should run for around 20-30 minutes
- The information you submitted to the Committee should not be the content of your presentation
- You must present more than just an outline of your thesis. Your presentation should be a substantive explanation of your thesis topic as a whole, including background, theoretical and core issues and their relevance to your proposal, etc
- Methodology and timeline info will be covered in the meeting itself, there is no need to include these in the presentation
- You should be prepared to answer questions and/or criticisms from the audience about your work
